PROFESSIONAL SUMMARY

Flutter developer with nearly 7 years of experience building mobile apps for iOS and Android, 5+ of them shipping products for the US market. I have built apps from scratch through release, integrated Stripe payments and real-time video calls with Agora, and improved the performance of apps in production. I work with Clean Architecture, automated testing and CI/CD, and take part in code reviews and mentoring other developers. I use Claude Code daily (agents, multi-agent workflows and skills) to speed up development and documentation.

EXPERIENCE

Mobile Application Developer (Flutter) · King Tide Feb 2021 – Present
Mexico City

- Build cross-platform Flutter apps across the full lifecycle: analysis, architecture, development, testing, release and maintenance on the App Store and Google Play.
- Build and maintain CI/CD pipelines with Codemagic, Fastlane and GitHub Actions to automate builds, code signing and deployments.
- Apply Clean Architecture with unit, widget and integration tests, and monitor stability with Firebase Crashlytics.
- Use Claude Code with agents, multi-agent workflows and skills to speed up development, reviews and technical documentation.
- Conduct code reviews, mentor team developers and work with backend, design and product teams in agile environments.

Key projects

BuzzStar — *real-time video calls between content creators and fans*

- **Results:** 4,400+ downloads, 33,000+ installed updates and a 19.5% App Store conversion rate.
- Implemented the Stripe payment flow.
- Delivered performance improvements to the production app.
- Integrated low-latency video calls with Agora SDK, Riverpod state management, REST APIs and Firebase.

Parlor Games — *NFL, NBA and NCAA game-pick app*

- Built the app from scratch through release on the App Store and Google Play.
- Implemented real-time scoreboards and integrated Firebase Analytics, Cloud Messaging and Remote Config.

Kiiwi — *last-minute deals from local businesses*

- Built the app from scratch with a GetX-based architecture, REST APIs and Firebase, and released it on both stores.

Inked Sports — *connects US college athletes with brands*

- Implemented a BLoC architecture, consumed GraphQL services, integrated Firebase and deployed to iOS and Android.

Unwrap — *gift lists, events and friend groups*

- Developed and maintained features with GraphQL and Firebase for iOS and Android.

Project Lead & Frontend Developer · Carmessie Velvet Independent project
carmessievelvet.com.mx — *Mexican fashion e-commerce with a pre-order model*

- Led the project end to end: scope definition, planning, coordination and delivery.
- Built the Next.js frontend: category catalog, product pages, favorites, cart, order tracking and returns.

Software Developer · Freelance Oct 2019 – Mar 2021
Metepec, State of Mexico

- Developed mobile apps and web solutions for multiple clients, from requirements gathering and technical design through testing and deployment, using Flutter, Kotlin, Java, PHP and JavaScript.

TECHNICAL SKILLS

Languages: Dart, Kotlin, Java, JavaScript, PHP, HTML5, CSS3
Mobile: Flutter, Clean Architecture, Riverpod, BLoC, GetX, MobX
Web: Next.js, React

APIs & DB: REST, GraphQL, Firebase (Firestore, Realtime Database), MySQL, PostgreSQL
Quality: Unit, widget and integration testing, Firebase Crashlytics, performance optimization, code review
CI/CD: Codemagic, Fastlane, GitHub Actions, Git
AI-assisted development: Claude Code: agents, multi-agent workflows, skills and documentation generation
Integrations: Stripe, Agora SDK, Branch, AppsFlyer, Firebase Analytics, Cloud Messaging, Remote Config
Tools: Android Studio, Xcode, VS Code, Postman, Figma

ACHIEVEMENTS

- **National champion, ENEIT Hackatec 2019 (Zacatecas):** led the team that built a fleet-management app for General Motors in 48 hours. We also placed third at the regional stage.
- **Pacific Scientific and Technological Research Summer 2018:** completed a research stay at CITEDI (Tijuana) on a Big Data processing project.
- **ENEIT 2017 and 2018:** coordinated multidisciplinary teams on technology innovation projects.

EDUCATION

B.S. in Information and Communication Technologies Engineering 2015 – 2020
Tecnológico Nacional de México / Instituto Tecnológico de Toluca

CERTIFICATIONS

Advanced Flutter · Flutter + Gemini · Riverpod Providers · Generative AI Fundamentals (Google) · Scalable Backend Development with NestJS · Node.js: Zero to Expert
